Relevant Coursework: Data Structures, Artificial Intelligence, Computer Vision, Natural Language Processing, Object-Oriented Programming, Computer Science Theory, Linear Algebra, Neurolinguistics

Professional Skills

Programming Languages: Python, Java, HTML5/CSS3, JavaScript, C
Software: Figma, Blender, Nomad Sculpt, Godot, Wix/Squarespace, Google Suite, Microsoft Office Suite
Technologies: Git, Github, Unix, Kaboom.js
Languages: English, Spanish (Fluent)

Relevant Experience

Web & UI Designer   November 2023 - Present
Self-employed   *New York, NY*
- Designed websites for clients in Figma and then implemented these designs either in code (HTML/CSS, JavaScript) or using a CMS of the client's choice (Squarespace, Wix, Wordpress).
- Created responsive, well-designed websites of varying complexity for individuals, small businesses and startups.

Administrative Assistant   February - May 2020, September 2021
Columbia University   *New York, NY*
- Assisted the Art, Architecture and Italian department with organizing and filing data that pertained to student class registration and academic events.
- Helped organize the office spaces and other rooms within the buildings, took phone calls, and assisted office visitors with obtaining any information that they needed.

Intern   June - August 2017
Blue Ocean Wealth Solutions (MassMutual)   *New York, NY*
- Sorted through and organized confidential client data for customers within the tristate area and beyond.
- Participated in a company stock market project where interns were educated on how the stock market worked and had to research a specific stock and report on its performance.

Projects

Youtube Homepage Replica
- Programmed a replica of YouTube's homepage with HTML and CSS with a responsive design.
- Implemented a workable search-bar that connects to YouTube Search, as well as thumbnails that direct the user to the videos directly.
